

The INMED Aquaponics® Social Enterprise (INMED ASE) is a revolutionary incubator of entrepreneurial agro-enterprises for climate-smart local food production in vulnerable regions to strengthen:

food security

climate adaptation

sustainable livelihoods

OUR SOCIAL PURPOSE

To transition historically marginalized populations, including people with disabilities, women and youth, from subsistence to self-reliance through a climate- adaptable food production business model based on aquaponics.

OUR BUSINESS PURPOSE

To generate revenue to ensure financial sustainability, jump-start agro-entrepreneurship and spark innovation while increasing food security and other benefits to society and the environment.

A 4-PHASE VALUE CHAIN OF SUPPORT FOR FARMERS

What is Aquaponics?
